

Download Dropping In On: Set I

Compatible Devices. When you drop in on your device, or a contact's device, the light ring on your Echo pulses green, you connect automatically, and can hear anything within range of the device. If you and your contact are using devices with screens, your contact also sees a frosted glass video that transitions to clear video shortly after connecting. Drop In is a feature that lets you instantly connect with an Echo device, including a contact's, as long as they have granted permission for you to do so. For instance, you can Drop In on any Echo device you own, or you can Drop In on a Echo device that your parents own. When you Drop In on an Echo device,...The Amazon Echo always seemed like a perfect device to use as an intercom within your house. This is now a reality, as Amazon has released its “Drop In” feature on all Echo devices. Here’s how to set it up. How to ‘Drop In’ on an Echo, Echo Show, or Echo Dot Hear what your friends really think of you by dropping in on their Amazon Echo By Brie Barbee @briearbee — Posted on May 6, 2018 1:00PM ... - Dropping In On: Set I
