

Download Jewelry Fundamentals Metalsmith

A metalsmith or simply smith is a craftsman fashioning useful items (for example, tools, kitchenware, tableware, jewellery, and weapons) out of various metals. Smithing is one of the oldest metalworking occupations. Shaping metal with a hammer is the archetypical component of smithing. Often the hammering is done while the metal is hot, having been heated in a forge. Jewellery (British English) or jewelry (American English) consists of small decorative items worn for personal adornment, such as brooches, rings, necklaces, earrings, pendants, bracelets, and cufflinks. Jewellery may be attached to the body or the clothes. From a western perspective, the term is restricted to durable ornaments, excluding flowers for example. Marc Adams School of Woodworking. 5504 East 500 North Franklin, Indiana 46131-7993. Office Hours: Mon.-Fri. 9am to 3pm (EST) Associate in Arts Degree in Art.
